## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## **Detailed Action**

### **Drawings Objection**

The drawings are objected to because:

(1) Reference numeral "30" (in Figs.2-4) has not been described in the specification.

(2) Reference character "H" (in Fig.3) has not been described in the specification.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### **Claims Objection**

Claims 9-11 are objected to because of the following informalities:

(1) In claim 9, lines 10-11, "said food body" should read --said food block--.

(2) In claim 10, line 4, "be use" should read --be used--.

Appropriate correction is required.

### **Claims Rejection - 35 U.S.C. 102(b)**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 9 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gosselin (U.S. Patent No. 6,220,133).

### **Claims Rejection - 35 U.S.C. 103(a)**

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2 and 5-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wentzel (U.S. Patent No. 2,948,064) in view of Gosselin (U.S. Patent No. 6,220,133).

Wentzel's butter cutter shows all the claimed structure except the cutting edge (5) does not extend transversely to a direction in which the measurement marks (4/8/9) are spaced from one another.

Gosselin shows a butter cutter comprising measurement marks (16/16a) spaced from one another in a first direction and a cutting edge (14a) extending transversely to the first direction.

It would have been obvious to one skilled in the art to modify Wentzel by providing the cutting edge transversely to a direction in which the measurement marks are spaced from one another to facilitate a thrust cutting action as taught by Gosselin.

#### **Indication of Allowable Subject Matter**

Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### **Prior Art Citations**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Parrott, Youngberg, Champlin, Stadeli et al. and Mattinson are cited as art of interest.
